LITERATURE WORKFLOW SAMPLE

Synthetic demonstration file - not a research paper.

1. Collect a PDF
Save the file as a draft in the shared literature library.

2. Complete the registration fields
Add the title, ordered authors, venue, year and source.

3. Organize with tags
Tags describe different classification dimensions.
Untagged papers remain visible in the global library.

4. Complete registration
Registration checks completeness, not research quality.

This public showcase uses isolated, temporary example data.
Its actions do not change the managed literature library.

Refresh the showcase to restart the example.
